

Gunther von Hagens'

# BODY WORLDS

The Original Exhibition of Real Human Bodies

## & The Three Pound Gem

BODY WORLDS, the original anatomical exhibition, presents the form, function, complexity, and beauty of the human body. Featuring a unique collection of 200 authentic human specimens—including whole bodies, individual organs, and transparent body slices—*BODY WORLDS 2 & The Three Pound Gem* offers visitors profound insights into the human body, health and disease, and the mysterious world of the brain—all preserved through a remarkable process called Plastination.

Physician and anatomist, Gunther von Hagens' BODY WORLDS exhibitions are the original, precedent-setting public anatomical exhibitions of real human bodies, and the only anatomical exhibits that use donated bodies, willed by donors for the express purpose of serving BODY WORLDS' mission to educate the public about health and anatomy.

**March 5–October 4, 2009**
