Subject: “Good Samaritan Health Professionals Act of 2017”

Dear Chairman Burgess and Ranking Member Green:

Representing a diverse coalition of providers and associations working to reduce medical lawsuit abuse and improve timely access to quality care, the Health Coalition on Liability and Access commends your decision to markup the *Good Samaritan Health Professionals Act of 2017* (H.R. 1876).

Over the past year, large-scale disasters have included the wildfires of California and the hurricanes and subsequent flooding of Texas, the Gulf Coast and Puerto Rico. These events highlight the need to ensure that medical professionals who seek to lend their expertise and assistance to victims of these natural disasters are not turned away or limited in the scope of their assistance because of the threat of medical liability lawsuits.

Inconsistencies in current federal and state laws could subject medical professionals and licensed health care providers to unjust medical liability lawsuits when they volunteer their services to disaster victims. The *Good Samaritan Health Professionals Act of 2017* would help protect medical volunteers from such lawsuits during a federally-declared disaster, and ensure that vital health care services often provided by medical volunteers remain available – all while respecting existing medical liability laws in individual states.

Additionally, the bill is narrowly tailored to apply its protections only to licensed health care providers, and will not apply to a health care provider if the harm caused was criminal or deliberate in nature.

The *Good Samaritan Health Professionals Act of 2017* will ensure that an adequate supply of trained health care professionals are ready, willing and able to volunteer their services during a catastrophe, and that they will not be deterred or turned away due to the threat of lawsuits.

On behalf of our coalition members, and patients and providers across the country, we urge the Subcommittee members to advance the *Good Samaritan Health Professionals Act of 2017* in the interest of improving medical care when disaster strikes.

Sincerely,
