Submitting Disclosures

Everyone submitting an abstract is required to submit a disclosure form. Please read the information in its entirety and complete the CME Conflict Agreement and Disclosure.

Select your answers by clicking on the radio buttons.
State if you agree or do not agree with CME Conflict for Education Statement. If No is selected you will be contacted by an AANS staff member.

AANS/NREF/NPA Content Validation Statements and CME Policies

The AANS/NREF/NPA requires that the content of CME activities provide balance, independence, objectivity, and scientific rigor. Planning must be free of the influences or control of a commercial entity and promote improvements or quality in healthcare. In addition, the content or format of a CME activity and its related materials must promote improvements or quality in healthcare and not a specific proprietary commercial interest. All AANS/NREF/NPA CME activities must be compliant with the following ACCME content validation statements:

- All the recommendations involving clinical medicine in a CME activity must be based on evidence that is accepted within the profession of medicine as adequate justification for their indications and contraindications in the care of patients.

- All scientific research referred to, reported or used in CME in support or justification of a patient care recommendation must conform to the generally accepted standards of experimental design, data collection and analysis.

Presentations must give a balanced view of therapeutic options. Use of generic names will contribute to this impartiality. If the CME educational material or content includes trade names, trade names from several companies should be used and not just trade names from a single company. Educational materials that are part of a CME activity such as slides, abstracts and handouts cannot contain any advertising, trade names without generic names (but listing of trade names from several companies is permissible) or product-group advertising.

Any individual refusing to comply with this policy and/or not disclosing relevant financial relationships annually will not participate in, have control of or responsibility for the development, management or presentation of AANS/NREF/NPA CME activities.
