

NeurosurgeryPAC

2020 Annual Report

NOTE FROM THE PAC BOARD CHAIR

Thank you, 2020 NeurosurgeryPAC contributors!

2020 was a rough year for many of us. With neurosurgical practices curtailing services, the cancelation of the American Association of Neurological Surgeons Annual Meeting and other challenges associated with the COVID-19 pandemic, contributions to NeurosurgeryPAC were down. Despite these challenges, organized neurosurgery made significant strides in [accomplishing](#) its legislative and regulatory agenda. Your PAC was also able to strategically target its contributions to support candidates for the U.S. House and Senate who were crucial in advancing its policy objectives. While in-person meetings and fundraisers were not possible, we adjusted to the virtual world and participated in an unprecedented number of events via Zoom and other platforms. Finally, most of the NeurosurgeryPAC-backed candidates were successful in their elections, demonstrating our ability to maximize the value of your PAC contributions.

Despite the challenges of 2020, I remain entirely optimistic that 2021 will be a significant improvement, and we will get back to our successful fundraising ways. As you are well aware, we will be asking for help from all our neurosurgical colleagues in the coming year. As always, your PAC board will be right there with each of you making the same donations we are asking you to make. Finally, NeurosurgeryPAC will support those candidates who advance neurosurgery's policy agenda — whether Democrat, Republican or Independent — continuing to base its giving decisions not on party affiliation but on individual candidate's positions on the issues. This has dictated where our support has consistently gone since NeurosurgeryPAC was established in 2005.

The coming year is going to be a great one for neurosurgery. We have the opportunity to do what we have always done — that is, to lead. I am confident that, between our clinicians and our scientists, COVID-19 will be laid to rest, and we can move forward with our own agenda.

Please join the NeurosurgeryPAC Board and me on this exciting ride.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Heary'.

WHAT IS NEUROSURGERYPAC?

ESTABLISHED IN
2005
POLITICAL ACTION
COMMITTEE OF AANS

DIRECT CAMPAIGN
CONTRIBUTIONS

NONPARTISAN

CREATED IN 2005, NeurosurgeryPAC is the political action committee of the American Association of Neurological Surgeons. NeurosurgeryPAC's mission is simple: solicit voluntary contributions from neurosurgeons to support candidates for federal office who support neurosurgeons.

NeurosurgeryPAC does this by making direct campaign contributions to candidates for the U.S. Senate and the U.S. House of Representatives who are supportive of the issues important to neurosurgery. NeurosurgeryPAC is nonpartisan and does not base its decisions on party affiliation but instead focuses on the records and campaign pledges of the candidates.

LEGISLATIVE PRIORITIES & ACCOMPLISHMENTS

Organized neurosurgery made significant strides in accomplishing its legislative and regulatory agenda, thus ensuring that neurosurgical patients continue to have timely access to quality care.

PROTECT PATIENTS' TIMELY ACCESS TO CARE	Bipartisan legislation to streamline prior authorization in the Medicare Advantage program — the <i>Improving Seniors' Timely Access to Care Act</i> (S. 5044 / H.R. 3107) — garnered overwhelming support from 300 members of Congress. Compliance with Medicare's appropriate use criteria program for advanced diagnostic imaging was delayed for an additional year until 2022.
FIX THE BROKEN MEDICAL LIABILITY SYSTEM	Legislation based on proven reforms that are in place in California and Texas — the <i>Accessible Care by Curbing Excessive LawSuits (ACCESS) Act</i> (H.R. 3656) — was introduced. Additional liability protection for volunteers and EMTALA-related care — the <i>Good Samaritan Health Professionals Act</i> (S. 1350 / H.R. 6283) and the <i>Health Care Safety Net Enhancement Act</i> (H.R. 3984), respectively — was considered.
IMPROVE THE HEALTH CARE DELIVERY SYSTEM	Solutions that will lower costs, expand choice, protect patients from unanticipated medical bills and improve public health — including the <i>Consolidated Appropriations Act, 2021</i> (P.L. 116-260) and the <i>Competitive Health Insurance Reform Act</i> (S. 350 / H.R. 1418) — were signed into law.
SUPPORT QUALITY RESIDENT TRAINING AND EDUCATION	Recognizing the need to ensure the availability of well-educated and trained physicians, legislation to fund 1,000 additional Medicare-supported graduate medical education (GME) positions and increased funding for the Children's Hospital GME program — the <i>Consolidated Appropriations Act, 2021</i> (P.L. 116-260) — was signed into law. Additionally, legislation to add 15,000 Medicare-funded residency training positions and defer medical student loan interest during residency — the <i>Resident Physician Shortage Reduction Act</i> (S. 348 / H.R. 1763) and the <i>Resident Education Deferred Interest Act</i> (H.R. 1554), respectively — achieved strong bipartisan support.
ALLEVIATE THE BURDENS OF ELECTRONIC HEALTH RECORDS	To promote interoperability, reduce unnecessary data entry and improve the functionality of EHR systems, the Office of the National Coordinator for Health Information Technology issued new rules.
CONTINUE PROGRESS WITH MEDICAL INNOVATION	Increased funding for the National Institutes of Health, Food and Drug Administration and other federal agencies, whose research investments are responsible for incalculable medical breakthroughs, was included in the <i>Consolidated Appropriations Act, 2021</i> (P.L. 116-260).
END THE OPIOID EPIDEMIC	The U.S. Department of Health and Human Services continued to implement the <i>Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act</i> (P.L. 115-271).
CHAMPION FAIR REIMBURSEMENT	Legislation to prevent steep Medicare cuts resulting from new office/outpatient evaluation and management (E/M) visit codes — the <i>Consolidated Appropriations Act, 2021</i> (P.L. 116-260) — was signed into law. Additionally, legislation requiring Medicare to value the post-surgery, E/M portion of the global surgery codes equal to the stand-alone E/M code values — the <i>Medicare Reimbursement Equity Act</i> (S. 4932) — was introduced.
