**SAME LETTER SENT TO
MULTIPLE HEALTH PLANS**

The Honorable Seema Verma
Administrator
Centers for Medicare & Medicaid Services
200 Independence Avenue SW, Room 445
Washington, DC 20201

Dear Administrator Verma:

The undersigned organizations represent the hundreds of thousands of physicians who provide care for our nation's patients every day. The COVID-19 (2019 novel coronavirus) public health emergency (PHE) has placed unprecedented strain on our physician members, including ongoing threats to their financial viability due to months of lost revenue from practice closures and/or operating at reduced capacity. In July and August 2020, the American Medical Association (AMA) surveyed 3,500 physicians who provided at least 20 hours of patient care per week prior to the pandemic.¹ A strong majority (81%) of surveyed physicians said revenue was still lower than pre-pandemic, with an average drop in revenue of 32%. Compounding the financial stress of lost revenue, practices are also incurring additional costs for heightened infection control protocols and personal protective equipment (PPE). **To help address the significant fiscal pressures placed on physicians by the COVID-19 pandemic, we urge the Centers for Medicare & Medicaid Services (CMS) to immediately implement and pay for Current Procedural Terminology® (CPT) code 99072 to compensate practices for the additional supplies and new staff activities required to provide safe patient care during the PHE.**

We recognize and appreciate the significant support and flexibility CMS has provided to physician practices. **However, it is imperative that CMS specifically compensate physicians for the additional expenses involved in treating patients during the PHE.** Practices incur significant costs in implementing the increased infection control measures required to provide safe care during the COVID-19 pandemic. These costs include additional supplies (such as cleaning products and facial masks for both staff and patients), clinical staff time for activities such as pre-visit instructions and symptom checks upon arrival, and implementation of office redesign measures to ensure social distancing. In the AMA survey referenced above, practice owners reported an average increase in PPE spending of 57% since February 2020, with 25% of owners saying that PPE expenses have risen at least 75%.¹ Nearly all (99%) surveyed physicians have implemented infection control protocols, such as pre-visit screening phone calls, screening for COVID-19 symptoms/exposure and checking patient temperatures upon office arrival, and limiting the number of patients in the waiting room. To address the financial impact of these new protocols related to the PHE, the CPT Editorial Panel approved CPT code 99072 on September 8, 2020. According to CPT guidance, 99072 is used to report the additional supplies, materials, and clinical staff time over and above the practice expense(s) included in an office visit or other non-facility service(s) when performed during a PHE, as defined by law, due to respiratory-transmitted infectious disease.²

In its comment letter on the proposed rule for the 2021 Medicare Physician Payment Schedule, the AMA/Specialty Society RVS Update Committee (RUC) requested that CMS immediately implement and pay for CPT code 99072 to recognize the additional supplies and new staff activities required to provide safe

care during the PHE.³ This recommendation was based on extensive research and analysis by the RUC Practice Expense During the COVID-19 Public Health Emergency Workgroup, which included responses from 50 national medical specialty societies and other health care professional organizations to a practice expense survey and more than 800 submitted invoices. The Workgroup's report, analysis, background information, and practice expense spreadsheet describing the \$6.57 in direct costs for the code are included in Attachment 05 of the RUC comment letter to CMS.

Our organizations advocate for CMS to immediately implement and pay for CPT code 99072 with no patient cost-sharing during the PHE. Payment for these additional costs should be fully funded and not be subject to budget neutrality. CMS could use remaining money from the CARES Act funding to pay physicians for these costs and/or recognize the decreased expenditures during the early months of the pandemic to waive budget neutrality. Your support will ensure that physicians receive the critical financial resources needed to maintain intensive infection control measures during the COVID-19 PHE.

If you would like to further discuss this matter, please contact Margaret Garikes, AMA's Vice President for Federal Affairs, at margaret.garikes@ama-assn.org.

Sincerely,
