

**U.S. corporate tax rates are higher than competitor nations,
and the medical device tax makes a bad problem worse.**

TAXES

**JOB
INNOVATION
PATIENT CURES**

**There is broad bipartisan support to repeal the device tax,
which is crushing company growth and job creation and chilling medical progress.**

The device tax has cost jobs across the nation. According to an industry survey, forgone hiring or layoffs have cost 33,000 industry jobs and as many as 165,000 jobs overall, and one-third of medical device manufacturers have reduced their R&D budgets as a result of the tax, hampering medical innovation and slowing medical progress.

REPEAL THE DEVICE TAX.

SUPPORT TAX REFORM. SUPPORT JOB CREATION. SUPPORT INNOVATION.
