Coalition Representing 450,000 Physicians Endorse Legislation to Repeal Medicare Payment Board

Unelected board has power to make steep cuts to Medicare limiting seniors' access to care

WASHINGTON, DC – Today the **Physician IPAB Repeal Coalition** — 27 medical organizations, representing 450,000 physicians — applauded Reps. **Phil Roe** (R-Tenn.) and **Linda Sánchez** (D-Calif.), and the over 200 original cosponsors, for introducing the Protecting Seniors' Access to Medicare Act. If enacted, this legislation would repeal the Independent Payment Advisory Board (IPAB), a government board that has the power to implement steep cuts to Medicare.

Created by the Affordable Care Act, the IPAB is a board of 15 unelected and largely unaccountable individuals whose primary purpose is to cut Medicare — a mission that, under the guise of controlling costs, will deny patients timely access to care and will undercut efforts to implement long-term, structural improvements to the Medicare payment system. Moreover, the IPAB sets a dangerous precedent by allowing such drastic changes to be made while circumventing the regular legislative process.

In their [letter](#) supporting the legislation, the coalition pointed out that physicians fully support efforts to stabilize Medicare and make our healthcare system more affordable, but the IPAB is simply the wrong solution for addressing these challenges. Seniors who rely on Medicare are already dealing with the instability caused by the broken physician payment formula. The IPAB is merely another arbitrary system that will only exacerbate an already stressed system and it must be repealed.

We look forward to working with Reps. Roe and Sánchez to gain passage of the Protecting Seniors' Access to Medicare Act this year.
