The Honorable Jeb Hensarling
Co-Chair
Joint Select Committee on Deficit Reduction
129 Cannon House Office Building
Washington, DC 20515

Dear Senator Murray and Representative Hensarling:

On behalf of the undersigned medical organizations, representing over 350,000 physicians, we urge you to recommend repealing the Independent Payment Advisory Board (IPAB) as part of your committee's deficit reduction package. Created by the Patient Protection and Affordable Care Act (PPACA), the IPAB is a government board whose sole job is to cut Medicare spending.

From the beginning of Medicare, Members of Congress have played an essential role in shaping policies that best meet the needs of their communities and constituents to ensure that the health care system is equipped to care for diverse populations across the country. With the advent of the IPAB, however, the people's elected representatives will no longer have power over Medicare payment policy. Instead, these major health policy decisions will rest in the hands of 15 unelected and largely unaccountable individuals. Furthermore, fewer than half of the IPAB members can be health care providers, and none are permitted to be practicing physicians or be otherwise employed. Thus, not only does the creation of IPAB severely limit congressional authority, it essentially eliminates the transparency of hearings, debate and a meaningful opportunity for critical stakeholder input.

America's physicians are also concerned that the strict budgetary targets and other limitations imposed on the IPAB will ultimately threaten the ability of our nation's seniors and disabled to obtain the health care they need, when they need it. The IPAB will be required to recommend cuts based on unrealistic spending targets starting in 2014. Unfortunately, we have all witnessed the inaccuracies associated with projecting future Medicare expenditures, most notably the problems with the sustainable growth rate (SGR) formula. It is estimated that it will now cost over \$300 billion to "fix" the SGR, and we clearly cannot afford the IPAB to become the next SGR. Today, the price tag for repealing the IPAB is relatively small, so Congress should seize this moment and repeal the IPAB now before the cost to do so becomes prohibitive and access to care problems become acute. Also, because IPAB funding is authorized to begin on October 1, 2011 and board members can now be appointed, there is urgency for repeal before this board is established.

Finally, providers representing roughly 37 percent of all Medicare payments -- including hospitals and hospice care -- are exempt from IPAB cuts until 2020; thus IPAB directed cuts will disproportionately fall on physicians. Physicians are already facing cuts in excess of 40 percent over the next decade, and without a permanent solution to the Medicare's sustainable growth rate (SGR) formula they will be subject to "double jeopardy" with cuts from both the SGR and IPAB.

While we recognize the need to reduce the federal budget deficit and control the growth of health care spending, the IPAB is simply the wrong solution for addressing these budgetary challenges. We need a workable alternative that adequately reimburses physicians and ensures that patients will have timely access to quality care.

Leaving Medicare payment decisions in the hands of an unelected, unaccountable body with minimal congressional oversight will negatively affect timely access to quality health care for our country's senior citizens and the disabled. We therefore urge you to join us and the hundreds of Democrat and Republican Members of Congress and organizations representing seniors, veterans, consumers, patients, healthcare providers, business and others in calling for the repeal of IPAB.

Thank you for considering our request.

Sincerely,
